Professional Summary

As a motivated 4th-year software engineering student, I bring a solid foundation in front-end technologies including JavaScript, HTML, and CSS. With proficiency in React.js, I have developed user-friendly web applications. Additionally, I possess valuable backend knowledge, enabling me to create robust and scalable solutions. Eager to leverage my skills and passion for innovation in a dynamic development environment.

Experience

EARTech IT   Istanbul, Türkiye
Software Engineer Intern   Aug 2023, Sep 2023

- Collaborated with a team of developers to create a web application project, utilizing DevOps methodologies.
- Delivered a comprehensive presentation on web development, showcasing expertise in the field and contributing to the team's knowledge base. This presentation highlighted key trends and best practices in the industry.
- Earned a certificate of recognition from the company for my contributions during the internship.
